Explanation of symbols used :- C-Cases; D-Deaths.

NEW DELHI-2 (INDIA);

The 22nd December, 1952.

K.MITRA,

for Registrar General, India.

Available in three different series, maturing after 5.7 and 12 years. The yield is 3%, 3.57% and 4.16% simple interest, respectively, at maturity. Thus, in the 12 year-certificates money increases by 50% on maturity. Interest is free of income-tax and super-tax and is not taken into account in arriving at the total taxable income

The certificates are obtainable from Post Offices doing Savings Bank business in denominations of Rs. 5, 10, 50, 100, 500, 1,000 and 5,000. An individual can invest upto Rs. 25,000, and two joint holders upto Rs. 50,000/-

Pull particulars obtainable from Post Offices, District Organisers of the Small Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers, or the National Savings Commissioners, Simile.

Deposits accepted in multiples of Rs. 100/- upto a maximum of Rs. 25,000 for a single depositor and Rs. 50,000 for two persons jointly. Interest at 3½ per annum (free of all taxes and not taken into account in assessing the total taxable income) is paid or remitted to the depositor's address every year. Deposits accepted at offices of the Reserve Bank of India at Bombay Calcutta, Delhi & Madras, and Branches of The Imperial Bank of India in other places transacting treasury business.

N-YEAR Hry Savings

Full particulars obtainable from District Organisers of the Small Savings Scheme Assistant National Savings Officers, Provincial National Savings Officers, or the National Savings Commissioner, Simia.

DEPOSITS

AC.275

TODAY'S BEST INVESTMENT FOR SMALL SAVERS

Births and deaths from principal discusses in sowns with a population of over 30,000 in India for the week ending the 29th November, 1962.

[•] In cases of towns where then has been an abnormal movement of population, it is likely that the population estimates may no be sufficiently reliable for calculating the birth and death rates.

[†] Figures not available.

Explanation of symbols used :—B.—Births; B.R.—Birth Rate; C.—Cholers; S.—Smallpox; P.—Plague; F.—Fevers; D.D.—Dy. sentery and Diarrhoea; R.D.—Respectory Discases; W.D.—Majernal Deaths; D.R.—Death Rate; I.D.—Infantile Deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for week ending the 29th November, 1952, relate to 178 towns with an estimated population of 23,597 thousands. The total number of towns is 281 and their population is 84,764 thousands. Thus 63% of the total number of towns representing 68% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 18,169 and 8,204 representing birth and death rates of 40.0 and 18.1 per thousand of population respectively.

(A) States—(Parts A and C).—The data here relate to 155 towns with an estimated population of 20,752 thousands. Information about Assam, Bihar and West Bengal could not be included. The total number of towns is 235 and their population is 29,570 thousands. Thus 66% of the total number of towns representing 70% of the total population is severed. The numbers of births and deaths recorded in these towns were 16,448 and 7,454

representing birth and death rates of 41.2 and 18.7 thousand of population respectively. The table at the e gives the position by States.

Nellore was the only town in Madras which recorded high death rate of 53.2 per thousand of population and thigh death rate was not particularly due to any one of specified causes.

(B) States—(Part B).—The data here relate to 23 tov. with an estimated population of 2,845 thousands. The tot number of towns is 46 and their population is 5,194 thousand. Thus 50% of the total number of towns representing 55% the total population is covered. The numbers of births at deaths recorded in these towns were 1,721 and 750 representing birth and death rates of 31.5 and 13.7 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thoou, and of population.
